Listing Claims

1. (Original) A coating composition comprising a binder consisting essentially of
- polyisocyanate crosslinking agent;
  - an isocyanate-reactive component having at least one compound having the following formula:

wherein X is an aliphatic or cycloaliphatic group, R<sup>1</sup> and R<sup>2</sup> are the same or different organic groups that are inert to isocyanate groups, and n is 2 to 4, and

- optionally, a polymeric component having a number average molecular weight of 5,000 to 50,000 and having reactive groups that crosslink with an isocyanate, where the reactive groups are selected from the group consisting of hydroxyl, carboxyl, glycidyl, amine and any mixtures thereof; and
- optionally, an oligomeric component having a number average molecular weight of 300 to 3,000 having reactive groups that crosslink with an isocyanate, where the reactive groups are hydroxyl, carboxyl, glycidyl, amine, aldimines, phosphoric acid, ketimine and any mixtures thereof; and
- additives consisting essentially of:
  - a disubstituted phenol antioxidant or a hydroperoxide decomposer,
  - an ultraviolet light absorber, and
  - a hindered amine light stabilizer.
